GENERAL CONDITIONS/SPECIAL SITUATIONS & LIMITATIONS

GENERAL CONDITIONS/S	I ECIAL SITUATIONS & LIVITATIONS
The primary purpose of the insp	pection and report is to educate the prospective purchaser/owner about the general condition of the building.
Repair and cost effective impro	vement advice is provided to increase this understanding. It is not a contractual obligation nor is it possible for the
	al problems solely on the basis of a visual examination. 80% of first year repairs should be revealed: not 100%.
DEFINITION OF TERMS US	SED IN THE PRELIMINARY INSPECTION REPORT:
Functional	(1) system was performing its' intended purpose at the time of the inspection, no significant loss of functionality
Monitor and/or Maintenance	(1) item is marginal; will require future repair or replacement. Owner is advised to monitor.
	(2) preventative maintenance repairs are required by property owner.
Minor Repair	(1) minor repair is recommended; cost should not exceed \$3000.00 and/or repair is not urgent.
Major Repair	(1) major repair is recommended; cost will exceed \$3000.00. Obtain contractor's estimates immediately.
Good Condition	(1) no defects were discovered that should require repair within the first six months, no significant loss of functionality
	Note: Limitations of a visual inspection and visually accessible physical evidence are in effect.
Fair Condition	(1) system or component is performing its intended purpose; but due to its age can fail at any time.
N/A	(1) not applicable/not accessible/not inspected/not installed or does not pertain to the subject property.
(?)	(1) performance/future performance of system or component is unpredictable. Further review is required.
	g the summary portion of the inspection is to discuss the significant aspects of their findings. There is no time limit
on these discussions. Ask as ma	any questions as you like to ensure we have addressed your concerns. The inspection process is a two-part system:
the verbal survey and the report	t. This report is not transferable to third parties as it will not clearly convey the information herein.
WEATHER CONDITIONS	
Snow/ rain/	limited the extent of the exterior inspection. Roof/ grade/ walkway/ decks were snow covered.
Absence of recent heavy rai	infall limited scope of basement foundation inspection.
The outdoor temperature wa	as too low to safely test the air conditioning system(s)/distribution systems and summer comfort.
✓ The outdoor temperature wa	as too high to sufficiently test the central heating system/distribution systems and winter comfort.
Weather conditions during in	spection:
INACCESSIBILITY	
☑ Basement/ Garage storage I	limited access/ visibility. Excessive storage limited access to:
Areas/ systems/ work in pro	ogress not fully visually inspected:
Other specific limitations:	
Plumbing system winterized	d (not fully inspected) Inspection of plumbing limited due to recent non-usage.
_ • •	shed

and animals/underground storage tanks/sub-grade plumbing drains/environmental testing/UFFI/mold and other indoor air quality contaminants/ window air conditioners/asbestos containing material/septic tanks/wells/marine structures and other items not specifically mentioned in the report are not included within the scope of this inspection. We do not disassemble equipment/bore holes into walls/floors and ceilings/move furniture and boxes/lift up carpets.

COST ALLOWANCES/TIME FRAMES AND SHORT TERM COURSE OF ACTION YOUR EXPECTATION LEVEL

We have included this summary to help you prepare and budget for future work. Please be cautioned that the following noted items represent the minimum amount of work that you will address in the future. Be aware that you may receive opinions from other tradespeople or knowledgeable parties that can vary drastically from our own. In this instance we require you to contact us immediately to seek clarification or request a site inspection at no further expense.

GENERAL CONDITION AT THE TIME OF THE PRELIMINARY INSPECTION

I The subject property requires less current repair consideration than the average house/building of similar vintage

The subject property requires an average amount of repair consideration compared with other houses/buildings of similar vintage.

The subject property requires more current repair consideration than the average house/building of similar vintage.

The average annual repair/maintenance budget for a home/building of similar size and vintage is: \$3500-\$4500 YOUR MINIMUM BUDGET ALLOWANCE:						
\Box over the first 0 -	2 years ver the fir	st 0 - 5 Years \Box over the co	ourse of			
To address the functional concerns listed below you must budget at the very least the following amount: □ \$2000-\$5000 □ \$5000-\$10000 ☑ \$15000-\$20000 □

YOUR RECOMMENDED COURSE OF IMMEDIATE ACTION:

Please review the preliminary report in its entirety and ask for clarification on any matter. This page must not be relied upon in isolation. Prior to continuing with the next step of the transaction/project consider the issues listed in the report. We advise you to consult with your realtor or lawyer regarding options on how to proceed. Also instruct your lawyer to obtain Title Insurance for you. You should request additional inspections as outlined in the full report to address your special concerns and/or matters that we can not inspect. You must also factor the limitations of the building inspection in your decision making process. 80% of first year repairs should be revealed: NOT 100%. Therefore you must anticipate and budget for the 20% unforeseen deficiencies that will not be discovered by a visual inspection. You must ask the seller for invoices/applicable warranties/plans and/or permits for work completed in the last five years.

See survey summary on preceding page for priorities and costs.	•

	Adequate v number of circuits are available to properly distribute intended load.
	distribution panel(s) are recommended(for future use).
	Spare circuits available at distribution panel:
	Double tapping noted at some circuits 2 circuits Possible overloaded circuit situation. Monitor.
	DISTRIBUTION Note: Determining branch wiring types is limited to visual inspection only.
	Predominant visible branch wiring type:
	□ Knob & tube (old copper) % □ ? ✔ Romex (conventional copper) % □ ?
	BX (metallic sheathed) % ? Aluminum % ? Ungrounded older romex % ?
	Note: Aluminum wiring is the original/principal branch wire type. 🔲 No unsafe conditions identified with outlets tested.
	BRANCH CIRCUITS OVERCURRENT PROTECTION:
	At main distribution panel(s): Glass fuses Cartridge fuses 🗹 Breakers
	At auxiliary panel(s): Glass fuses Cartridge fuses 🖉 Breakers
	Fuses/breakers
	Properly sized fuses/ breakers are presently used to protect branch circuits.
	Arc fault circuit interrupters (A.F.C.I) are recommended to be installed at panel to protect bedrooms/convenience receptacles.
	General
	Good vilighting source is provided to all habitable areas & service rooms.
	Additional lighting recommended at:
	Good v number of receptacles is provided to all habitable areas & service rooms.
	Additional receptacles recommended at:
	REPAIR/UPGRADING RECOMMENDATIONS
	Upgrade amperage of main service to: 🗌 100 AMPS 📄 200 AMPS presently or upon the next home improvement undertaken.
	Most/ some convenience receptacles in dwelling do not have secondary ground (i.e. 2 prong); add GFCI receptacles.
	Rework poor wiring connections at: Basement Garage Attic Panel
	Repair/ replace lighting fixtures/ switches/ ceiling fans at:
	Repair/ replace receptacles at
	Missing coverplates/ loose outlets/ exposed cabling observed at:
	Installation/maintenance of smoke/CO alarms at all floor levels of the building/dwelling is required. A.F.C.I. recommended/ bedrooms.
	G.F.C.I. receptacles are req'd at: kitchen counter exterior garage/ outbuilding bathrooms spa/ whirlpool bath

1/2-Yr. Priority Ke	y ATTIC/ROOF SPACES
Maj Min N/A Mon	LIMITATIONS:
Major Rep Minor Rep N/A Monitor Functional	The inspection process cannot predict the ability of the roof stucture to support heavy snow loads.
Major Repair Minor Repair N/A Monitor Functional	Could not access attic due to seized cover/ no attic access/ further review is required prior to proceeding.
	Attic reviewed at hatch access. Floor not walked on. All attic spaces were not fully inspected.
	ACCESSIBILITY
	Good/ fair access to attic Attic floor walked on Attic has lofting potential
	Attic roof space has been converted into living space 🔲 Attic interconnected with adjacent dwelling. Install firewall/fire separation.
	No access to attic is installed Access not required Access to roof spaces/ knee wall spaces is recommended.
	Relocate access Increase size of attic access Insulate/ weatherstrip hatch Additional access required.
	VENTILATION
	Domed roof units Soffit vents Gable/ridge vents Attic fan(s)/ turbine vents Spaced board sheathing
	Roof vent(s): Good condition Fair condition Repair/ replace roof vents at:
	Additional vents recommended at soffit/ ridge area Soffit baffles to be installed in the attic at eaves section.
	INSULATION
	Approx. R-value: R0 to R15 (0-5) R20 to R28 (6-8) R32 to R40 (10-12) R40+
	Type: Cellulose fibre Fibre glass batts/ loose fill Rock wool Vermiculite
	Additional insulation recommended to be installed on the attic floor. 🔲 Additional insulation recommended around air ducts.
	Insulation is unevenly distributed on attic floor. Add/ redistribute insulation. Evidence of vapor retarders:
	ROOF STRUCTURES (where visible)
	Type: 🗌 Rafters/ Collar ties 🔲 Trusses 🔲 Good condition 🔛 Fair condition 🔲 Some localized repairs/ defects
	Additional collar ties/ structural support is recommended.
	ROOF BOARDS/SHEATHING (where visible)
	Type: Plywood Board sheathing Good condition Fair condition
	Probability of replacement of some/ most sheathing with next shingle replacement
	Fair/ poor condition due to inadequate ventilation. Possible mold/ mildew residue developing on sheathing.
