June 16, 2021

This letter will confirm that the property located at 1099 St. Clarens Avenue in Toronto qualifies for a laneway house build in the rear portion of the lot, under Toronto's new "Changing Lanes" program.

I visited the property on June 16, 2021 and confirmed siting, emergency access and other appropriate qualifications to certify its eligibility.

The maximum size of a permitted as of right build appears to be approximately 1,082 square feet (over two floors - main and upper), with the ability to include an optional car garage on the lower floor, with vehicle entry off the laneway.

A basement might also be possible here, adding additional square feet to the above total, but in most cases the floor plate of the basement will be smaller than the ground floor and upper floor, the space usually cannot contain bedrooms or a bathroom or a kitchen, and the cost of construction will be significant.

The relatively new (2018) Changing Lanes program from the City of Toronto allows qualifying property owners to construct a laneway house "as of right" on their property, with simple building permit application and no political approval or committee of adjustment approval required. No variances are required and no appeals or "neighbour vetoes" are permitted. The city also waives development cost charges.

Should you have any questions about 1099 St. Clarens Avenue in particular, or the Changing Lanes program in general, please feel free to contact me any time, or visit our website.
