SUMMARY

20/20HOMEINSPECTIONS

This report should not be considered as a complete home and property inspection. The 20/20 Home Inspections report is prepared for the owner to provide general information about this property. The inspector is available by telephone to any interested party to answer questions about the house. Please read the full report prior to calling the inspector. We are also available to provide any prospective buyer general orientation, helpful maintenance tips and improvement consulting for a fee. This general review inspection is essential to compare your expectations, intended use and special needs with the realities of the house.

Interested parties should be advised that without this general review our obligation and liability can only remain with the seller.

Ajax Ontario L1T 0M4

Property Inspected	111 Brookside Dr			Municipality	Toronto	v
Inspection Date Sep	ot 11th 2023	Time	10:30	Inspector	Pradeep Samaroo, RHI	•

SUMMARY (GENERAL COMMENTS)

In comparison to other homes of similar vintage in the vicinity the functional condition of this building/dwelling is; mostly original. ~

Recommended improvements or repairs to the building/dwelling have been addressed in the report.

It is suggested that the highlighted concerns be considered priorities.

Please be advised that failure to address concerns promptly may result in additional problems and/or consequential damages.

Comments:					

- The preliminary inspection report issued by the inspector is prepared with reasonable skill and care. This consulting service is limited to the physical evidence that was visually accessible at the time of the inspection. This report is not transferable to anyone other than the client as this report does not include the verbal information imparted by the inspector which is vital to fully understand the service and contract.
- The required repairs to the building include but are not limited to what is reported herein due to the limitations and restrictive nature of the visual inspection. The client is hereby warned that not all deficiencies will be discovered. At best 80% of the first year repairs should be revealed; not 100%. Determining the presence of mold, fungi and other indoor air quality contaminants are specifically not included.
- The inspector's role is principally educational; to provide you with a better understanding of the building. We will not detect all problems.
- The preliminary inspection is partially designed to reduce your risk of buying an older home. However we cannot eliminate this risk. The inspector/inspection firm will not assume any of your risk in buying an older property. Further inspections by specialists are required.
- The client is advised to annually budget at least 1% of the building's value for general maintenance and unforeseen repairs.
- The client is warned that resultant damages may occur to the building systems or components if the recommended repairs in this report are not carried out in a timely manner. This is especially the case in matters concerning uncontrolled water/vapour.
- Cost estimates if provided in this report are minimums and are intended to be a rough guideline only. Estimates are based on the most cost effective solution to address the problem and will not include betterment. Obtain accurate cost estimates from contractors immediately.
- The preliminary inspection does not cover code compliance issues set by governments or other regulatory authorities.
- The preliminary inspection does not take into account manufacturer's recalls and eligibility for mortgage insurance, building or homeowners insurance.
- The preliminary inspection process is conducted in a fair and impartial manner. Accordingly this report is not provided as an aid for negotiation in a real estate transaction. We do not overstate or under value any issue to benefit any party.
- 11) The purchaser is advised to ask the property owner if they are aware of any defects that would not normally be detected by a visual inspection. The purchaser is advised to revisit the property before closing to verify that functional conditions remain unchanged or retain the inspector for this task.
- 2 12) The client hereby acknowledges they are contractually obliged to contact the inspector immediately to arrange a site visit at no extra expense in the event of an unforeseen and/or unreported problem or upon receiving a conflicting opinion and prior to any corrective work.

I have read this contract and report and am aware of the limitations of the inspection process. I accept this report and supplements according to the conditions as stated herein. I am aware that the fee paid for this inspection is for professional time and is not a guarantee of present or future conditions and is not an insurance policy of any kind. I am aware that I can retain the inspector to re-evaluate the property prior to closing for evidence of new water leaks and/or items not previously inspected due to seasonal limitations for an additional fee.

GENERAL CONDITIONS/SPECIAL SITUATIONS & LIMITATIONS

The primary purpose of the inspection and report is to educate the prospective purchaser/owner about the general condition of the building. Repair and cost effective improvement advice is provided to increase this understanding. It is not a contractual obligation nor is it possible for the inspector to identify all potential problems solely on the basis of a visual examination. 80% of first year repairs should be revealed: not 100%.

DEFINITION OF TERMS USED IN THE PRELIMINARY INSPECTION REPORT:

	Functional	(1) system was performing its' intended purpose at the time of the inspection, no significant loss of functionality						
	Monitor and/or Maintenance	(1) item is marginal; will require future repair or replacement. Owner is advised to monitor.						
		(2) preventative maintenance repairs are required by property owner.						
	Minor Repair	(1) minor repair is recommended; cost should not exceed \$3000.00 and/or repair is not urgent.						
	Major Repair	(1) major repair is recommended; cost will exceed \$3000.00. Obtain contractor's estimates immediately.						
	Good Condition	(1) no defects were discovered that should require repair within the first six months, no significant loss of functionality						
	Good Condition	Note: Limitations of a visual inspection and visually accessible physical evidence are in effect.						
	Fair Candition							
	Fair Condition	(1) system or component is performing its intended purpose; but due to its age can fail at any time.						
	N/A	(1) not applicable/not accessible/not inspected/not installed or does not pertain to the subject property.						
	(?)	(1) performance/future performance of system or component is unpredictable. Further review is required.						
		the summary portion of the inspection is to discuss the significant aspects of their findings. There is no time limit						
		ny questions as you like to ensure we have addressed your concerns. The inspection process is a two-part system: This report is not transferable to third parties as it will not clearly convey the information herein.						
	WEATHER CONDITIONS	. This report is not transferable to third parties as it will not clearly convey the information herein.						
	Snow/ rain/	limited the extent of the exterior inspection. Roof/ grade/ walkway/ decks were snow covered.
