

March 13, 2025

This letter will confirm that the property located at 33 Pickering Street in Toronto qualifies for a laneway house build in the rear portion of the lot, under Toronto's "Changing Lanes" program.

**I visited the property on March 13, 2025** and confirmed zoning, siting, emergency access and other appropriate qualifications to certify its eligibility.

The maximum size of a permitted as of right build appears to be approximately 1,052 square feet (over two floors - main and upper), with the ability to include an optional car garage on the main floor, with vehicle entry off the laneway.

A basement is also possible here, adding to the square footage above, but in most cases the floor plate of the basement will be significantly smaller than the ground floor and upper floors, the space cannot usually contain bedrooms or a bathroom or a kitchen, and the cost of basement construction can be significant.

Because of the relatively deep lot here, and a favourable positioning of the existing house on the lot, this property is somewhat rare in that it can support a laneway house up to the maximum allowable build here, while still allowing for some amount of optional car parking *outside* the laneway house, at the laneway. With this configuration, the proponent could choose to build the laneway house with interior parking, or no interior parking (all living space), while still maintaining substantial parking on the property, outside the laneway house, at the laneway.

There are some mature, protected trees on or near the property lines here, but a proponent can avoid damaging or removing these and still complete a build at the size indicated above.

The relatively new (2018) Changing Lanes program from the City of Toronto allows qualifying property owners to construct a laneway house "as of right" on their property, with simple building permit application and no political approval or committee of adjustment approval required. No

variances are required and no appeals or “neighbour vetoes” are permitted. The city also waives development cost charges.
